D

Attach mag bars to nodes

E

Attach panels in sequence to the mag bars starting at the top and smoothing down each side

F

Assembled pop up system

LIGHT FITTING INSTRUCTIONS

1

3rd light available as an optional extra

2

3

LECTERN WRAP ASSEMBLY INSTRUCTIONS

FABRIC WRAP (INCLUDED)

Press Studs hold the fabric wrap around the case.

GRAPHIC WRAP

Use Mag Tape to attach the graphic to a Steel Bar on the back of the case.

Apply Mag Tape along both 800mm edges on **REAR** of graphic wrap.

CASE LID LIGHTING STORAGE

Halogen spotlights are stored in a protective case with space for an optional third spotlight.

PREPARING GRAPHIC ATTACHMENT

FRONT (2130 (H) x 653 (W) mm) / REAR PANEL (2130 (H) x 757 (W) mm)

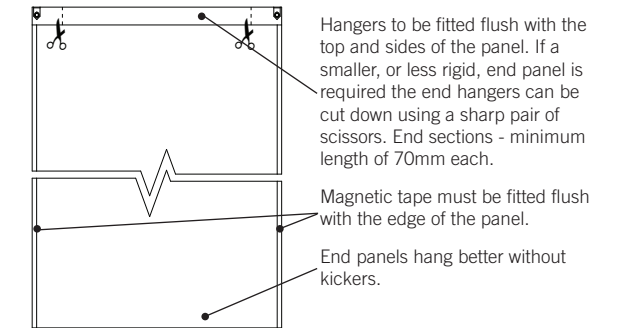

Hanging kit (hangers) to be fitted flush with the top of the panel.

Hangers come complete with magnetic brackets attached on the front and double sided tape on the rear.

Magnetic tape must be fitted flush with the edge of the panel.

Rigidising strip (kicker) to be fitted flush with bottom edge of the panel.

END PANEL (2130 (H) x 653 (W) mm)

Hangers to be fitted flush with the top and sides of the panel. If a smaller, or less rigid, end panel is required the end hangers can be cut down using a sharp pair of scissors. End sections - minimum length of 70mm each.

Magnetic tape must be fitted flush with the edge of the panel.

End panels hang better without kickers.

CASE GRAPHIC WRAP (800 (H) x 1725* (W) mm)

* Graphic size is only to be used as a guide. Case size may vary due to moulding process. Each Graphic should be made to suit the individual case.

**Please note: Image area is offset from centre of wrap.

ADVANTAGE 3x4

Panel Hanger - Front / D-End	90868
Panel Kicker	90869
Reverse Curve Panel Hanger	90874
Reverse Curve Panel Kicker	90875
Halogen Light 220v 150w	90715
Mag Tape	390025

PANEL INFORMATION

Graphic panels for pop up systems can be produced on a wide range of substrate materials. Usual methods are a paper print with a clear front protective laminate and a lightstop backing, so the print is totally encapsulated.

An alternative method is to print on an inkjet receptive plastic sheet which is front laminated for protection.

We recommend you consult your substrate materials supplier regarding suitable materials for your particular brand of large format printer.

After applying the hangers, kickers and magnetic tape leave the panel flat for 24 hours to allow the adhesive to cure.

When storing fabric or graphic panels always roll them up with the magnetic tape on the inner surface.

Graphic panels supplied by Plex Display are 480 micron PVC covered in a choice of Fronrunner, Prelude or Loop Nylon. The hangers, kickers and magnetic tape are supplied attached to the panel.

OPTIONAL EXTRAS / REPLACEMENTS

1. Halogen Light 220v 150w
2. Aluminium Mag Bar
3. Magnetic Panel Hanger - Front / D-End
4. Magnetic Tape Roll

SYSTEM COMPONENTS

1. Frame
2. Drawstring Frame Bag
